Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Amrein et al. (6,371,957).

With respect to claims 1, 12, 25, Amrein et al disclose a multiaxial connection osteosynthesis system for the spine including a bone anchor member (2) having a head (9) a connecting member (1), a connector (7,72,77) having a first inwardly deformable housing (8) adapted to receive the head and integral with a second portion, as best seen in the figures, the second portion having a U-shaped opening having an open end remote from the first inwardly deformable portion and a seat (19), the open end adapted to receive the connecting member (1) along an axis, the first and second portions extending along the axis for clamping the connecting member in the second portion, as best seen in the Figures, the system including clamping means (20,28) for clamping the connecting member in the second portion the clamping means (20) being disposed within the U-shaped opening; as best seen in FIGS. 12-14, wherein the connector is arranged so that, when the clamping means loads the connecting member in the second portion in the direction of the axis, the connecting member loads the seat to

inwardly deform the first portion and immobilize the head therein; as set forth in column 3, lines 35-43, column 4, lines 1-29, column 5, lines 1-65, and as best seen in FIGS.1-14.

With respect to claims 2-11, 13-24, 26-34, Amrein et al disclose all the limitations, as set forth in column 3, lines 35-43, column 4, lines 1-29, column 5, lines 1-65, and as best seen in FIGS.1-14.

Response to Amendment

Applicant's arguments, see Remark, filed 11/9/06, with respect to the rejection(s) of claim(s) 1-35 under 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Amrein et al.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
